

IEA Bioenergy

WEBINAR SERIES

The past, present and future for biomass gasification

January 30, 2020

4:00 pm - 5:00 pm Central European Time
10:00 am - 11:00 am North American Eastern Standard Time
3:00 pm - 4:00 pm Greenwich Mean Time

Moderator

Luc Pelkmans
IEA Bioenergy
Technical Coordinator

Presenter

Dr. Jitka Hrbek
University of Natural Resources
and Life Sciences Vienna
Senior Scientist, Institute for Chemical
and Energy Engineering

Presenter

Berend Vreugdenhil
TNO Energy Transition
Innovation Manager Gasification,
Gas Cleaning and Upgrading

Presentation Summary

Gasification has a long history with ups and downs regarding successes. An important factor in the success perception of gasification is related to the expectations of gasification. In this webinar we will show that gasification is a versatile technology with many possible outlets and that there are many success stories to be told. We will also discuss some of the learnings from the past decades to illustrate how sometimes a technology fails to be successful. All in all, the future of gasification is looking bright and this we will also elaborate upon. However, with a warning that we must remain realistic about what is needed to reach success!

The IEA Bioenergy Technology Collaboration Programme (IEA Bioenergy TCP) is organised under the auspices of the International Energy Agency (IEA) but is functionally and legally autonomous. Views, findings and publications of the IEA Bioenergy TCP do not necessarily represent the views or policies of the IEA Secretariat or its individual member countries.
